

STONY PLAIN SUN.

VOLUME NINE.

STONY PLAIN, ALBERTA. THURSDAY, OCT. 4, 1928.

Whole Number 426

Duffield Doings.

A fire broke out last Saturday afternoon in the residence of Mr George Tyrrel, south of town. Mr and Mrs Tyrrel were away from home at the time. The building, with the contents, was a total loss. When the alarm was given, two auto loads of men went down from here, but were too late to be of service.

The Postoffice opened this week on the South side, with Mr J Collingridge as Postmaster. It was thought at one time, by the Northsiders, that this public utility could be made to stay on their side, but a monster petition presented to the Postal Superintendent carried the day for Mr Collingridge, and the Department allowed the removal back to the original site, much to the satisfaction of practically all who receive mail here.

Mr Ohls n, of the Home elevator, shipped another car of wheat yesterday that should grade No. 2.

President Mrs Taylor, of the local W. L. succeeded in getting the W. L. Constituency Conference to meet next year in Duffield.

Corp. Moses was a business visitor here on Tuesday.

Complaint has been made of the running at large of swine in the village.

Railway Time Table.

Going east—Every morning at 5:43 Mon., Wed. Fri morning at 6:55.

Going west—Every midnight at 24:24 Sun. Tues. Friday at 1:25 p.m.

Fires at Golden Spike.

The southern part of Golden Spike district seemed to be all lit up for a few days and nights last week, owing to the presence of fires in the brush, and some half-dozen of the farmers there have suffered loss.

The fire appears to have started a few miles south of the New church, and spread east and south toward Graminia.

Louie Heichel Sr. lost a ten ton stack of hay;

To the east of him, the Giese Syndicate lost 3 hay stacks (about 25 tons) which they had put up on the Whitelock farm.

Hy Dittmer had a stack of green feed burned.

Mrs Brown had 4 stacks of hay burned, on the O'Sullivan quarter.

Over Graminia way, Jac Treit had his new barn and a quantity of hay burned. His new residence, under construction, was not damaged. Mr Treit was away at the time.

Mr Tennis lost a haystack, and had a busy time saving his grain stacks.

Fires had been running in the brush for a few days, but not much attention was being paid to these, with the result that when the big wind arose Saturday evening, it fanned these into dangerous fires.

Corp. Moses has been making an investigation as to the delinquents who let the fires run off their premises, and it is probable some will appear before the Magistrate next Tuesday.

LOCAL NEWS.

Mr J A Barrie, the popular proprietor of Edmonton Beach summer resort, has moved with his family to the City, where Mr Barrie will resume his position with Massey-Harris Co.

Mr Bennett, director for Edmonton district for Alberta Wheat Pool, is billed to give an address on the operations of the Wheat Pool at an early date, in Stony Plain.

Mr and Mrs D E Moyer have moved into the Turlock house on 3d St. temporarily, while awaiting the completion of their new residence.

Mr Fuller, of the Departmental inspection staff for high schools, paid the local high school a visit on Friday last. After staying in the classroom for the afternoon session, the Inspector complimented Principal Harrison on the fact that he found the classes further advanced than any he had had the pleasure of inspecting so far this session.

Monday's train from Prince Rupert was about 8 hours late.

Mr F W Lundy wishes to announce that a representative of Robertson, Winkler & Hawe, the Edmonton legal firm, will be in Stony Plain every Saturday afternoon, and any other day for which a client wishes to make an appointment. Mr H D Laird will also be in Stony Plain by appointment Saturday next, October 6th.

Inga Councillors are billed to meet in Stony Plain tomorrow Friday, Oct. 5.

R. C. services will be held in the Town Hall on Sunday next at 11:30 a.m.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M McKlenburg, eye specialist, 10159 101st St., Edmonton.

Thursday's Fire.

Shortly before six o'clock Thursday evening an alarm of fire was turned in, and part of the local fire brigade had a run. The fire was in the rear of the Pailer residence, on Second street west. Some boys playing in an outhouse had set it afire, the flames spreading to the horse barn adjoining. The fire was got under control by the bucket brigade, before the fire-fighting apparatus.

Some delay was caused by a misdirection, when the bell was rung. No. 1 Chemical being run over by hand to the Alton residence.

Damage of less than \$100 was done, including the damage done to the feed oats and hay stored in the barn which was injured by the spray from the chemical.

It has been suggested that parties giving the alarm by ringing the town bell should stay at the hall to direct firemen to the scene of the fire.

Noxious Weeds Notice!

Noxious weeds from mature plants are spread by the wind. Hand pull and burn all such plants. Burn any ripe blossoms of Sow Thistle and Canada Thistle that you may find.

Require all threshing machines, combines, wagons and racks used at the time of threshing, to be thoroly cleaned before moving on to your farm or leaving it.

Gather and burn all weed seeds left on the ground after threshing. See that your summer fallow goes into the winter "black."

Attend to this or much of the good work that has been done in weed control and eradication will be undone.

Your co-operation in the campaign for a "weed free province is solicited.

Register all threshing machines and combines with the Department of Agriculture.

W. J. STEPHEN,

Real Foundation of Modern Business

The so-called practical man of business, the financier, the farmer, during the many decades of the past has been inclined to regard the scientist as hopelessly impracticable, a dreamer, a faddist. Within more recent years marked change in this respect has taken place, and today the scientist, the chemist, the laboratory research worker, is recognized as among the most practical and essential of the world's workers.

To the great universities of the world, and to Governments must be credited in large degree the recognition now accorded to the scientist, while many of the world's foremost industrial concerns now regard their research departments as being among the most profitable departments of their great enterprises.

A recent article by Dr. E. E. Free in "Chemical Markets," New York, declares that science earns for the United States more than thirty billion dollars a year, or nearly half of the national income. It has, he says, doubled the productivity of agriculture and more than quadrupled that of mining. Continuing, Dr. Free wrote: "Surely the business men of America ought to be convinced by now that it is worth while to exhaust every one of science's industrial resources; yet the surprising fact is not only that these resources are unexploited, but that only a small fraction of them have been put to work. Not a tenth of the facts that scientists know are being used. The rest of them lie idle in the heads of professors or in the unread pages of scientific books."

Som years ago a gentleman named Dudley became a chief chemist of one of the large American railways. He devised methods of testing coal and coke and lubricating oils, and saved millions of dollars for his road. He helped the steel people find out how to make more lasting rails. He invented cheaper and better paints. He suited the available water supplies to the engines, and saved millions of boiler-tubes from being burnt out or corroded. It is estimated that the scientific improvements devised by Dr. Dudley and his successors on other railways have saved more money than all the railroad wages ever paid in the United States.

Sometimes a scientific problem solves itself as if by magic. The origin of the potato industry is an example. The salt miners of Germany a generation ago were bothered greatly by some bitter, evil-tasting stuff mixed with the salt they were trying to mine. This bitter stuff had to be taken out, or by they piled it up anywhere the rain always washed some of it down into the rivers where it spoiled the water and poisoned the fish. Then a great chemist, Dr. Justus von Liebig, happened to hear about this worthless stuff. He found out there was potash in it. He knew that crop plants need potash—that it could be used as a fertilizer. He suggested this to the farmers of Germany. Now the potato industry is one of the greatest in the world. The useless, bitter stuff became the chief assets of the mines.

Tons of sulphuric acid and arsenic used to be blown out of the smoke stacks of copper smelters, sometimes killing animals and crops on neighboring farms. A scientist built an electric apparatus which collects these poisonous particles out of the smelter smoke. The apparatus is now in use all over the world, and the sulphuric acid, instead of floating out to damage the farms, is used in chemical industry, while the arsenic has become the chief reliance of the scientists who are fighting the boll-weevil, which threatens the destruction of the cotton plantations of the southern states.

In like manner we have the story of the botany professor who cleared the western United States irrigation ditches of a weed that was choking them and compelling the farmers to employ a man night and day to clear the intake of the pipe line. "Suspend a few crystals of copper sulphate in the ditches, in little canvas bags," he advised. The weeds died and disappeared in a week. This scientist knew that copper was especially poisonous to that kind of weed. His practical knowledge increased the wealth of the whole irrigated region.

In Saskatchewan a clay-working industry was having trouble with its raw products. One of the professors of the University of Saskatchewan was called in, and as a result of his knowledge, investigations and tests, he found that the correct mixture of clays was not being made. He found a remedy, and the industry is now on a paying basis and expanding its operations.

The battle against rust and wheat and other parasites, the removal of moisture from wheat without impairing its milling and baking qualities—these and other important subjects are receiving the attention of the scientists of Canada, and their solution will mean hundreds of millions of dollars to the farmers of the Dominion.

All of which only goes to demonstrate that every industrial interest in Canada, whether it be in the manufacturing class or in the work of production from the farm, the mine, the forest or the fisheries, should strongly support the present move for larger and more extensive research work in this Dominion. And of all classes, the farmer will probably prove to be the greatest gainer.

Shampoo Yourself With Cuticura Soap

Anoint the scalp, especially spots of dandruff and itching, if any, with Cuticura Ointment. Then shampoo with a suds of Cuticura Soap and warm water. Rinse thoroughly. A healthy scalp usually means good hair.

Honor For Lost Fliers

Monument on French Coast Dedicated To Memory Of Nungesser and Coli

A monument honoring the memory of Captain Charles Nungesser and Captain Francois Coli has been dedicated at Etretat, where the French airmen left the coast of France on their ill-fated attempt to fly to New York more than sixteen months ago. It bears the inscription:

"To the First Who Dared."

At the base of the column, which resembles an obelisk, are marble figures, three times life size, representing the two flyers. The monument has been erected on the cliffs at Etretat at the point over which Nungesser and Coli in their plane "White Bird" passed on May 8, 1927, before they disappeared in the west. On the front are engraved the words: "Nungesser and Coli, May, 1927." The inscription on the reverse side recalls their attempt.

WEAK AND NERVOUS

A Condition Always Due To Thin, Watery Blood

This blood and weak nerves generally are found together. Red blooded people seldom complain of nervousness. The reason is that the blood feeds the nerves and keeps them toned up to do the work nature intended. When the blood is thin and weak it fails in this important function and nervous troubles follow. The following cases will interest those who need a tonic for the blood and nerves. Mrs. D. Veno, Union Square, N.S., says: "I was suffering from nervousness. I write to tell you what Dr. Williams' Pink Pills did for me. I had become badly run down and reached the stage when I could not do my housework. I was not only weak, but my nerves seemed completely shattered. The least noise would startle me and I was subject to nervous headaches. Worse still, I could not sleep at night. Perhaps I would get an hour or two sleep, and then lie awake for the rest of the night. I had reached a stage when I actually feared I would lose my mind. Up to the time I decided to take Dr. Williams' Pink Pills, nothing I had taken seemed to do me any good. I got a few boxes of these and soon there was no doubt they were the medicine to help me. As I continued the use of the pills I gradually grew stronger, ate better and could sleep at night, and now I am as well and strong as a woman could wish to be. I hope some other weak, nervous person will be benefited by my experience." Dr. Williams' Pink Pills are sold by all medicine dealers or by mail at \$1 a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Serve One Customer

Faris Store Opened For Sultan Of Morocco To Shop

One of the world's largest department stores ran full blast for just one customer recently. Si Moulay Henada, Sultan of Morocco, wanted to buy a thing or two and he insisted on doing his own shopping. His wish was a command to the Printemps store in Paris and for an hour in the early evening, during the Sultan's recent incognito visit to France, everyone of the hundreds of clerks stood behind counters, scores of floorwalkers were at attention, and managers and French secret service men peered from behind piles of goods, while the young ruler, with his Grand Vizier, wandered about, buying everything that pleased his eye, leaving it for the Grand Vizier to foot the bill.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

Humane Society Awards

The following were among the awards by the Royal Canadian Humane Association recently announced: Medals, David Johnston, Brooksby, Saskatchewan; John D. White, Vancouver; John McHugh, Yukon Territory; Margaret Martin, Waterton Lakes, Alberta. "Parchment certificates, Howard Mayers, White Rock, B.C.; Mary and Victoria Barrowman, Kaslo, B.C.; and W. H. Hepher, Powell, B.C.

"Modernize" Your Farm This Modern Way

Nearly every building on the farm can be greatly improved and "modernized" by Gyproc.

This famous wallboard is recommended by leading contractors for both new and old construction because it gives advantages offered by no other material—fire-safety, rigid strength, economy and cold and heat resistance.

All these vital advantages! And you get them for nothing—because Gyproc costs no more than products that have none of Gyproc's remarkable qualities.

Gyproc makes durable, permanent walls and ceilings in less time and at less cost. Gyproc Joint Filler on the joints assures a smooth, flat surface which takes any decoration—particularly suitable for Alabastine.

SEND FOR FREE BOOK
Canada Gyproc and Alabastine Limited, Winnipeg, Canada.
Please send handsome free booklet, "Walls that Reflect Good Judgment," which contains valuable information on Gyproc for farm use.

Name _____
Address _____

GYPROC Advantages for Farm Buildings

Easy to use.
Low cost.
Workable as lumber.
Cannot warp, bulge, crack, shrink or burn.
Takes any decoration.
Resists heat and cold.
Vermitt proof.
Eliminates repairs.
Protects your stock.

Ideal for lining barns, poultry houses, grain bins and other farm buildings.
Especially suitable for covering attics and basements into extra rooms.

"EMPIRE" GYPROC Fireproof Wallboard

"I wonder if that old fat girl is trying to flirt with me?"
"I don't know, but I can easily find out by asking her—she's my wife."

Ballplayer: "We gave the umpire fifty bucks to let us win the game."
Friend: "And still you lost?"
Player: "Yeah; the umpire was crooked."

ASPIRIN

To break a cold harmlessly and in a hurry try an Aspirin tablet. And for headache. The action of Aspirin is very efficient, too, in cases of neuralgia, neuritis, even rheumatism and lumbago! And there's no after effect; doctors give Aspirin to children—often infants. Whenever there's pain, think of Aspirin. The genuine Aspirin has Bayer on the box and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer manufacture. While it is so well known that Aspirin means Bayer manufacture, to secure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Diamond Jubilee Committee Issues Official Commemorative Medal of Beautiful Design

One of the final tasks of the National Diamond Jubilee Committee, which arranged the celebration last year of the Sixtieth Anniversary of Confederation, has been the preparation of an official commemorative medal. The records of 1867 showed that the government of Sir John A. Macdonald issued a medal commemorating the confederation of the provinces. This medal, which was designed and struck in England, showed on the obverse the effigy of Queen Victoria and on the reverse a group of five figures symbolizing the handing by Britain to the four original provinces of the pact of confederation. In designing a medal commemorating the Diamond Jubilee, the National Committee decided to show on the obverse an effigy of His Majesty King George V, and on the reverse a single figure which would in some measure represent the spirit of unity and strength which has been developed in Canada during

those of Cook and Vancouver. The whole is surmounted with the Latin motto from the Canadian coat-of-arms, "A mari usque ad mare." The National Committee is happy to acknowledge the splendid co-operation of the London and Paris mints in the production of the original dies of this medal. The dies arrived in Canada early in August and the work of striking the medal is proceeding at the Royal Mint in Ottawa. The medal is three inches in diameter—one of the largest ever handled by the Ottawa Mint. All the metal used is from Canadian mines and the medal is thus a happy combination of British, French and Canadian artistic and technical effort.

The committee has ordered gold medals to be struck for His Majesty the King, for His Excellency the Governor-General of Canada and for the Prime Minister of Canada. Gold medals will also be presented to

Transform Cadillac For Railway Service

Canadian Pacific Uses High Power Sedan For Inspection Work

A high power Cadillac sedan specially equipped with flanged steel tired wheels has just been issued from the Angus shops of the Canadian Pacific Railway at Montreal for the use of the Engineering Department of the company. Capable of travelling on the rails at as great a speed as upon the road, the machine will be used for inspection trips on the C.P.R. lines throughout the country. Service conditions are harder on the tracks for braking, and there are three systems on the car; the ordinary foot brake operating on the rear wheels, the conventional emergency brake, and a special supplementary brake applied by turning the steering wheel, acting through brake-shoes on the front wheels. The axles have been changed, the front axle being rigid and more rugged, and the rear axle, instead of being mounted in conjunction with the differential, has had the differential removed and replaced by a one-piece alloy steel axle. This is driven by a single gear with a ratio of 4 to 1, in place of the ordinary differential ratio of 4 and ten eighths to 1.

The wheels themselves are of special design and are equipped with rubber insulation between the steel tyre and the wheel centre in order to lessen shock at rail joints, switch points, diamonds and crossovers. The lighting system, moreover, has been supplemented to comply with railroad regulations.

The car is a comfortable sedan model and will enable officials of the Canadian Pacific's engineering department to cover great distances in a short time on their inspection trips under any weather conditions. It is the only machine of the kind at this time officially in the company's service, although other smaller motor cars on rails have been improved in other parts of Canada.

Human Power Plant

Psychologists Claim To Have Heard Messages From Nerves In Body

Human life has been revealed as a wonderful electric power plant and system of transmission lines.

The car is a comfortable sedan model and will enable officials of the Canadian Pacific's engineering department to cover great distances in a short time on their inspection trips under any weather conditions. It is the only machine of the kind at this time officially in the company's service, although other smaller motor cars on rails have been improved in other parts of Canada.

Two experimenters in psychology say they have listened to messages flashed over the network of nerves in the human body, translating the impulses of nerve currents into sound waves that human ears can hear.

Impulses are detected by electrodes attached to the body. These nerve messages, magnified eight hundred times by a powerful amplifier, can be broadcast by wireless.

Brandon's Broadcasting Station.

Brandon's first broadcasting station has just gone into daily use, and a studio will give grain and stock reports each day, and once a week, in the evening, will broadcast local concert programmes.

Mining Possibilities of Northern Manitoba and Saskatchewan Attracting Great Attention

Another Classroom

On Wheels Appears

Ontario Government and C.P.R. Operate Two School Cars

Education in these days is hard put to it to keep pace with civilization although the one is dependent upon the other. In the more remote districts of Canada, in particular, the cause of culture has a struggle to survive, and were it not for modern methods the rising generation in many parts would remain untaught.

Although agricultural communities enjoy the most modern educational facilities and the "little red schoolhouse" has assumed an increased importance and has considerably enlarged its scope, other districts suffer by necessity from neglect. Outlying areas with a scattered population find inter-communication at best in summer time under the most favorable conditions difficult enough, but when winter closes down a partial paralysis is brought about. Such localities could not afford school facilities nor could permanent schools adequately serve the community, for during the winter season children could not travel with safety. This problem, which for a number of years remained unsolved, has been met at last by a singularly practical and effective remedy, the "school car."

Co-operating with the Ontario Department of Education, the Canadian Pacific Railway has evolved the school car, and late this summer issued from its Angus Shops the second and especially prepared coach for this unique purpose. It is now operating in the district in Ontario lying to the west of Fort William and Port Arthur, while its predecessor is carrying on its duties as it has for some time past in Northern Ontario in the neighborhood of Cartier and Chapleau.

The school car is equipped in every way like the most up-to-date "little red schoolhouse," having a bright classroom with blackboard, regulation desks, maps, globe, school-books and so forth; a library of books for the students and adult visitors as well; and comfortable living quarters for the teacher. From the outside its appearance is that of a standard first class coach, but inside it has been entirely remodelled and especially protected and equipped to withstand the rigors of the coldest weather when left on a lonely siding.

The mobile schoolhouse solves in a unique fashion a vital and hitherto unsolvable educational problem.

That young Canadian sprinter from the West coast astonished the world. To beat the West in anything a fellow has to be speedy.

The year 1928 will undoubtedly be a record one in the history of Canadian mining. The search for mineral deposits has been unequalled both for its intensiveness and for its breadth of activity. Never in any one year has so much money been spent in exploration as will have been spent this year. The operations are Dominion-wide but by far the most important are those that are directed to areas underlain by the Precambrian rocks of the northern parts of the provinces of Quebec, Ontario, Manitoba, and Saskatchewan, and of the Northwest Territories.

The most spectacular explorations are those that are headed into the more remote parts of the country east and west. The Hudson Bay When it was learned last winter that transportation to Flin Flon was to be provided, that that large ore-body was finally to be exploited, and that other large ore-bodies in northern Manitoba had been discovered, the Department of Mines, at Ottawa, was flooded with requests for information regarding that part of the country. Then interest broadened and the possibilities of the exploratory work were considered. It was felt that the completion of the Hudson Bay Railway to Churchill and the increase of boat transportation on the bay would render accessible a great stretch of country that had hitherto been regarded as Canada's hinterland. There came the desire to be on the ground early and secure the best. The result is that a great many prospecting parties have left for these northern areas. The exploratory work is entrusted to hardy men of experience and knowledge. Some prospectors have gone to Hudson Bay by way of northern Ontario and northern Manitoba, others have left by boat from points on the Atlantic coast. One company alone has sent by boat ten parties of two men each and the necessary supplies. These will be assisted and directed by men sent in by aeroplane.

In the more readily accessible areas and in areas where transportation facilities are of the best, search for more mineral deposits is being prosecuted with feverish intensity. This takes the form of surface prospecting and of underground testing by diamond drilling, shaft sinking, and drifting. All this exploratory work has been given a powerful impetus by the discoveries centering on the northern part of the Manitoba-Saskatchewan boundary, the Rouyn area of western Quebec, and the Sudbury, Patricia, and other areas of Ontario, and it is expected that by the close of the year a very important addition will be made to the known and developed mineral reserves of the country.

To Study Ancient Designs

The National Museum, Ottawa, will conduct a study of the ancient handicrafts and designs of French Canada, in order to determine the extent of their influence on the arts and crafts of the various Indian tribes. It is thought that many, if not most of the patterns in bead and silk work that appear on Indian specimens may not be aboriginal at all but copied from European patterns.

Among the curious regimental pets belonging to units of the British Army at different times have been a chimpanzee, an ape, a lion, a sea-eagle, a cheetah, a black bear, and a lamb.

Young Lady: "Your novel has a charming ending."
"What do you think of the opening chapters?"
"I have not got to them yet."
— Lustige Kölner Zeitung, Cologne.

the last sixty years. A number of mites in working out its idea and a Canadian artists assisted the commission of Mr. C. W. Jeffreys of Toronto was finally adopted as expressing most accurately the views of the committee. The general idea conveyed by this design was afterwards translated in his own original way into medallion art by the eminent sculptor and engraver, Mr. Raymond Delamare, of Paris, France.

Illustrations of the medal reproduced herewith show a new effigy of His Majesty King George V, which is the work of one of the foremost British artists, Sir Bertram MacKenzie. The reverse shows a figure which admirably typifies the qualities of youth, energy and confidence in the future. By its position, facing the Atlantic, from which blows a strong invigorating breeze, there is a suggestion of the cultural origins of our people and of the ideals of liberty and justice inherited from overseas. The figure stands on a pedestal bearing the date 1867-1927. Surrounding the pedestal are sheaves of wheat and wreaths of maple leaves and in the background a map of Canada, in the upper part of which the shield from the Canadian coat-of-arms appears. On the Atlantic side of the map are the names of the first discoverers, Cartier and Champlain, and on the Pacific side

H.R.H. the Prince of Wales and to the Rt. Hon. Stanley Baldwin, Prime Minister of Great Britain, who paid a special visit to Canada in connection with the Jubilee ceremonies last year. A gold medal will also be deposited in the Dominion Archives. Silver medals will be struck for His Excellency the Viscountess Willingdon and for H.R.H. Prince George, who accompanied the Prince of Wales on his visit last year, for members of the Privy Council of Canada, the Lieutenant-Governors of the provinces and the Prime Ministers of the provinces. Bronze medals will be presented to senators and members of the House of Commons, to members of the provincial governments, to the surviving sons and daughters of the Fathers of Confederation, to members of the National Diamond Jubilee Committee and to officers of the Provincial Diamond Jubilee Committees. The medals are being struck as rapidly as possible at the Royal Mint and it is hoped that the distribution will be completed before the end of the present year.

The Rt. Hon. W. L. MacKenzie King, Prime Minister of Canada, took advantage of his trip to Europe in connection with the signing of the Kellogg treaty to present gold medals to His Majesty the King, H.R.H. the Prince of Wales and the Rt. Hon. Stanley Baldwin.

Manitoba Fisheries

Organization Meeting Held To Place Industry On A Firm Footing

At a meeting of the Manitoba Co-operative Fisheries Limited, attended by more than 100 representative fishermen from Lakes Winnipeg, Manitoba and Winnipegosis, plans were completed to place the industry on a basis where the fishermen will share to a greater extent in profits made in the business. Suggestions were made to appoint agents at Chi-

cago and New York. Last year Manitoba produced 18,000,000 pounds of fish and those who belonged to the organization were responsible for a catch of about 7,000,000 pounds.

Distinguished Farmers

Wheat Pool Includes Amongst Its Members a Prince, Baron, Duke And Countess

The Alberta Wheat Pool now includes among its members a prince, a baron, a duke and a countess. They have between them a signed-up acreage of 10,000 acres, it was stated at the offices of the pool in Calgary.

These distinguished members are His Royal Highness, the Prince of Wales, Baron Rodney, the Duke of Rutland, and the Countess de Foras. The latter, who has a farm at High River, has just signed up a contract for 350 acres with the pool.

Tourists Aid Development

The tourist is often the fore-runner of the homemaker and investor. He visits the country and sees with his own eyes the character of its people and resources, and if he later returns to settle or invest he is able to do both in a more satisfactory manner.

Nine in a Line

The distinction of being the point in the British Empire from which the largest number of bushels of grain are shipped direct from farm to rolling stock belongs to Vulcan, Alberta, on the lines of the Canadian Pacific Railway. Here is a view of the local elevators, nine all told, seven of which are of double capacity. Last year Vulcan shipped two and a quarter million bushels of grain, and indications are that it will exceed its own record this year.

"I read your remarkable article. In fact, I read it three times."
"You flatter me!"
"Not at all. Even now I don't understand it!"—Pelo Mala, Paris.

FEDERAL AID FOR HIGHWAYS SHOULD CONTINUE

Regina. — That federal aid for highways should be continued with additional aid to the various provinces was the view of the delegates attending the 15th annual convention of the Canadian Good Roads Association who dealt with many other matters of interest during the sessions here. Elimination of level crossings, building cement bridges and roads, the financial responsibility of urban municipalities in road development, gasoline taxes and winter roads all had their place on the agenda.

Hon. O. L. McPherson, minister of public works for Alberta, was unanimously chosen president of the association and other officers were elected. Seven invitations were presented for next year's meeting place and while no decision was arrived at Prince Edward Island would seem to be in favor of the delegates.

When the subject of Federal aid for highways was under review this topic were crystallized in the following resolution:

"Resolved, that in view of the very marked and acknowledged benefit which comes to Canada as a whole because of the large investments being made in the highway construction and maintenance by various municipal and provincial bodies, such benefit being of a far reaching nature and affecting many branches of Dominion government service; and whereas the Federal government has collected in excess of \$200,000,000 during the past 10 years which can be directly or indirectly traced to highways; and in view of the fact that the Federal government recognized its interest in highways by a first grant of \$20,000,000, which has been expended; and, in view of the increase in highway travel throughout Canada, this association, in its annual convention assembled, reaffirm its oft-stated belief in Federal aid to highways and that additional aid should be granted at the earliest possible moment to the various provinces and the executive committee is hereby instructed to make every reasonable effort to have this resolution made effective."

Entertaining Premier King

Entire British Cabinet Invited To Dinner At Savoy Hotel

London.—Premier Stanley Baldwin and the whole cabinet have been invited to the dinner to be tendered to Premier Mackenzie King of Canada by the Canada Club on October 10. This will be Mr. King's only speaking engagement in England. He will spend about three days in England and during that time is in hope of getting about to see the countryside. Hon. P. C. Larkin, Canadian High Commissioner, will preside at the dinner, which will be held at the Savoy hotel.

May Appeal To Privy Council
Ottawa.—Permission to carry their appeal to the Privy Council in England will probably be granted to the Proprietors of the Trade Association, founded by the department of labor to be an association in restraint of trade. The matter, it is stated, is now before the department of justice.

Swedish Government Resigns
Stockholm.—The government of Premier Elman, leader of the central bloc, resigned as an outcome of the recent election in which the government party lost several seats, including that of Foreign Minister Lofgren.

Fighting In China
Peking.—More than 2,000 Chihli-Shantung soldiers have been killed opposing the Nationalists northeast of Tien Tsin, says the Kueilin news service, reporting the surrender of the former Northern army.

Mayor Of Carleton Place
Lethbridge.—Mayor Mark Spencer, Carleton, pioneer and eight times chief magistrate of that town, died recently at Rochester, Minn.

W. N. U. 1793

Does Not Need Warships

South Africa Protected By British Fleet, Says General Smuts

Capetown, South Africa.—Speaking to an audience which was predominantly of Dutch origin, General Jan Christian Smuts, leader of the opposition in the assembly, was vigorously applauded in a memorable speech on the secession question.

General Smuts at one point declared: "It was not the intention of the empire we would have to go to America or France, or some other big country to protect us because we are not safe. One warship could bring us to our knees. But today we are not considered in a kernal. We are in a friendly circle with a powerful British fleet to help us if any injustice is planned toward us."

"We need not spend millions on a fleet," General Smuts continued, "but can concentrate on projects of development so necessary to a young country. The British Empire is not a band tying us, but she is a helping hand."

Will Analyze Frosted Wheat

Scientists At University of Saskatchewan Have Started Work
Saskatoon, Sask.—Now that four Canadian scientific laboratories, including that of the University of Saskatchewan, have determined that milling and baking qualities are not affected by lengthening or dampening of grain, scientists here, in collaboration with the investigations carried on elsewhere in Canada, are turning their attention chiefly to frosted wheat.

With painstaking effort as to detail, the Saskatchewan University laboratory, under general supervision of Dr. T. Thorvaldson, professor of chemistry, and direct supervision of Dr. R. K. Larimer, has begun work with the object of determining the actual damage done by frost to the milling and baking quality of wheat.

Expresses Sympathy For Florida Sufferers

King George Cabled Condolences To U.S. President Coolidge

London.—That King George takes a keen interest in world affairs is evidenced by the cable sent by him to President Coolidge, expressing his sympathy to the people of the U.S. for the sufferers in the Florida hurricane.

The message read: "I desire to express to you and through you to all kindred intermediaries to the American people, my sincere condolences upon the disaster which has recently overwhelmed Porto Rico, the Virgin Islands and the state of Florida as a result of the recent hurricane and my sympathy with all those that have suffered from its effects."

Forty Killed By Explosion

Powder Magazine In Old Spanish Fort Caused Accident

Mellila, Morocco.—By an explosion of the powder magazine of the ancient Spanish fort of Cabrorizas Bajas forty persons were killed and 200 injured, some of them probably fatally. The explosion demolished the old citadel, on a rocky hill overlooking the town. All houses around the citadel were destroyed.

Women and children were among the dead and injured. Nine soldiers of the Spanish garrison at the fort were killed. The government appropriated 25,000 pesetas (\$4,125) for relief of the families of victims.

Canada Will Be Represented
Ottawa.—Canada will be represented at the International Air Conference, which takes place in Washington in December. This was stated officially at the Department of National Defence. Canada's representative has not yet been selected but an announcement with respect to the selection will be made later. The conference has to do with civil aviation.

Chinese Soldiers Face Starvation
Shanghai, China.—Generals of the Nationalist army notified Nanking headquarters that 100,000 soldiers are in danger of starving to death in the Changhai vicinity. The message also said the villagers were suffering from lack of food and soldiers were not provided with boots or blankets.

Director Of Cancer Research

Dr. Ellice McDonald, shown above, who believes that he can forestall cancer by treating the subject through the administration of thyroïd gland extract and other means. Dr. McDonald is director of cancer research at the University of Pennsylvania and the Philadelphia General Hospital. Dr. McDonald is a Canadian who had his early education at Winnipeg and finished it in Toronto. He has three brothers, Brig-Gen. H. F. McDonald, C.M.G., D.S.O., of Winnipeg; D. H. McDonald, M.P.P., of Qu'Appelle, Sask., and F. A. McDonald, Winnipeg.

Attending University Of British Columbia

Percy Williams Will Take Freshman's Course In Vancouver

Vancouver.—Percy Williams, Olympic 100 and 200 metre champion, will attend the University of British Columbia here for one year. After that he will take the business administration course at the University of Washington. This was decided at a meeting of members of the committee in charge of Williams' affairs here, which Williams attended. Williams spent two days in Seattle and returned home in order to discuss all angles of his situation with his friends here. He had been invited to attend the Washington institution.

"He is remaining in Vancouver for the year because he feels that it would be unfair to those who welcomed him so wonderfully and who have been so good to him to leave," a member of the committee said.

Zeppelin To Start October 10

London.—Germany's new transatlantic dirigible, Count Zeppelin, will start its first flight to America not later than October 10, says an Exchange Telegraph dispatch from Berlin. The generally favorable weather predicted for the North Atlantic during the first two weeks of October makes a start at that time almost certain, the dispatch said.

Anglo-French Naval Pact

United States Government Rejects Agreement In Note Sent To Both Powers

Washington, Sept. 26.—An unqualified rejection of the so-called secret Anglo-French naval accord as a basis for renewed discussions on naval arms limitations is understood to be contained in the United States replies to Great Britain and France which were forwarded to Paris and London.

A separate note for each government was sent the American embassies for transmittal to the foreign offices.

It had been expected one note would be sent to both governments. Although it was learned the notes are not identical in form they are understood to be similar to each other in their essential facts.

It is understood both notes comprise a lengthy discussion of the American stand on naval disarmaments with respect to cruisers and submarines. This subject has been the centre of disagreement between the United States and Great Britain and is held to have caused the failure of the 1927 Geneva conference.

As indicated at the White House it is expected the notes will reiterate the United States stand on naval disarmaments as outlined at the 1927 Geneva conference.

Will Make Second Attempt Next Year

American Pilot Stranded On Flight To Stockholm Via Greenland

Copenhagen.—Bert Hassell, American flyer, who arrived here from Greenland with his trans-Atlantic companion, Parker Cramer, announced he would make another attempt next year to fly from the U.S. to Stockholm by way of Greenland. Hassell and Cramer, who were rescued in Greenland after having been stranded in the Arctic wastes, arrived at Copenhagen aboard the steamer Fulton.

They were accompanied by Prof. William H. Hobbs, leader of the University of Michigan Greenland expedition, which had brought them to safety.

B.C. Cabinet Unopposed

Vancouver.—The nine portfolio holding members of the British Columbia cabinet, headed by Hon. Dr. S. F. Tolmie, premier and minister of railways, were re-elected to the provincial legislature when they were unopposed at nomination proceedings. Voting was to have taken place on October 4, if there had been contests.

Air Mail Service Starts

Toronto.—Daily air mail service between Montreal and Toronto, and an international service between Montreal and Albany, N.Y., started October 1.

CAMPAIGN IS ON FOR ELECTIONS IN GREAT BRITAIN

Yarmouth, Eng.—The first open move in a nation-wide campaign for the forthcoming British general election, when Prime Minister Stanley Baldwin and his government appeal to the British voters for another five-year mandate, will be made here when 2,600 Conservative delegates, a record gathering of its kind, go into conference to hammer out a party platform.

Within a month from now Conservatives, Liberals and Labor, by means of their annual conferences will determine the issues upon which they will wage the biggest party struggle in this country since the Great War.

The most intense fights are expected on tariff questions, the extension of protective measures by means of "safeguarding" of industries by special import duties.

British political strategists are getting ready to adopt new means and methods of appealing to the public.

Close watch is kept on the rapid development of wireless and talking movies. "Talkies" are being made of Baldwin and other political leaders; motor cars and trucks with the latest broadcasting apparatus are ready for swift campaigns through the country districts. The hunt for party songs is on, and again the Conservatives are in the lead with song sheets already ready.

One little delicately alludes to the "flapper" vote, that uncertain bloc of five million newly-enfranchised young women for whom all parties are angling, all claiming flapper support, and none too certain of it.

Cement Firms Protest

Producers Will Contest Move For Removal Of Duty

Ottawa.—Contesting the application of the Canadian Council of Agriculture for removal of the import duty on cement, representatives of the cement producers in Canada continued the survey of facts relating to the industry before the tariff advisory board.

In the brief of the Canadian Council of Agriculture, which was filed recently, it was claimed that the prosperous condition of the industry did not justify continuance of the existing import duties. In opening the case for the producers generally, Professor J. Jackson, Toronto, categorically denied the claims of the applicants. He sought to prove that the cost of production did not leave 57.5 per cent. of the sales to provide overhead and profits, as maintained in the brief of the council of agriculture.

Decline In Unemployment

Stockholm.—Unemployment is on a steady decline in Sweden. Latest government figures, just released, show that the number of people out of work who applied for aid in July was 9,500 as compared to 11,100 in June, or a decrease of about 14.9 per cent.

Support For Gov. Smith

New York.—Representative Mary T. Morton, Democrat, New Jersey, in an address broadcast from here, appealed to women to vote for Governor Smith, whom she termed "the greatest humanitarian this country has ever produced."

Rain Damages Ontario Crops

Sault Ste. Marie, Ont.—Heavy rains and continued cold weather are alarming farmers of this district. Scores of acres of grain are said to be rotting in the fields, and potatoes planted on low ground are being ruined by excessive moisture.

Enters Novel Plea

Detroit.—A plea that he was walking in his sleep when he shot and killed his wife, Amelia, has been entered as a defense for Chester Kutzuh, 48, on trial here charged with murder.

France is the only European country whose present birth-rate shows an improvement on the pre-war figure.

Distance, so far as the Canadian Pacific is concerned appears to be measured no longer in miles. Time is the important factor and, at least in respect of package goods, the Canadian Atlantic and Pacific coasts are drawing closer each year. Here, Captain Brinell is signing for Canadian Pacific express packages to be carried over the airway between Winnipeg and Calgary. For several months the Company has operated an air service between Rimouski, Quebec, Montreal, Ottawa and Toronto. The new link in the air chain was forged under auspices of Premier Bracken of Manitoba.

Here and There

(137)
Grain handlings in the Port of Montreal this season passed the 200,000,000 bushel mark on August 30th, receipts and shipments being evenly balanced. Total handlings at that date were 15,253,592 bushels ahead of the similar period of last year.

A twenty-six pound eight-ounce muskrat, 47 inches long and 17 1/2 inches in girth, has been caught after an exciting battle near Pine Rapids on the French River, by Edmund Sleehart, of Chicago. The giant has been entered in the Canadian Pacific Bungalow Camp Trophy Competition.

The University of British Columbia at Vancouver has a new flag pole second only in height to that at Kew Gardens in London, England—the tallest in the world. Both are one-piece poles of Douglas fir, that at Kew being 214 feet high and that at the University 201 feet high. The Vancouver Court House has one measuring 197 feet, while the Provincial Parliament buildings have one measuring 165 feet.

The Australian Government has just completed a deal for eighteen foundation heifers and two bulls from the McClelland stock, the widely known Aberdeen-Angus breeders of Brandon. The animals will be selected from Mr. McClelland's Glenavon herd by the head herdsman of the Australian Government and shipped by the Canadian Pacific Railway by way of Vancouver. This shipment apart from some purebred dairy cattle to the Orient from British Columbia, is probably the first exportation of purebred cattle from Canada overseas.

Another link has been forged in the air express services extending from the Gulf of St. Lawrence into the heart of Canada. The Canadian Pacific Express has undertaken an air express service between Winnipeg, Regina and Calgary in co-operation with Western Canada Airways and in connection with air mail routes. This means that express matter shipped from England may be picked up from incoming Atlantic liners at Rimouski, speeded by air via Montreal, Ottawa and Toronto, placed aboard westbound trains, trans-shipped to airplanes at Winnipeg, and delivered direct to the consignee at Regina or Calgary, or placed on a train again if the destination is further west, putting the shipment many days ahead of the usual service.

A six and three-quarter-pound speckled trout, a monster of its kind, has been caught on the Nipigon River by Philip L. Peterman, of Laurium, Michigan. This catch will probably win the Nipigon River Bungalow Camp trophy for the record catch of the season, for none of the fish previously entered in this competition approach it in size. The winner receives a silver replica of a fish mounted on an oak plaque and an engraved gold label button. Fishing on the Nipigon has been better this season than it has been for ten years. The regulation of the water level to prevent fluctuation has resulted in fish remaining in their old haunts, and sport is now as good as it ever was.

WHITE STAR LINE CANADIAN SERVICE

THE CRIMSON WEST

—BY—
 ALEX. PHILIP

Published by Special Arrangement
 With Thomas Allen, Publisher,
 Toronto, Ont.

CHAPTER II.—Continued.

The next day, dressed in light clothing and a pair of running shoes, Donald went around Stanley Park. Wishing to condition himself, he ran the greater part of the way.

Spring comes early in Vancouver as compared with the East. In January the buds are bursting in Stanley Park. The balsam-poplar, scented with earthy odours from the deep woods, seemed to Donald to possess magic properties. The blood sang in his veins. Overhead, big white seagulls screamed and soared; squirrels retreated in chattering fright as he raced down the road, and over all was the sound of the booming surf. The wind rushed past his ears, and he shouted aloud from sheer exuberance of spirits and the joy of living.

Donald covered the distance from English Bay to Granville Street at a jogging trot. The air of the gymnasium seemed close after being in the open. The big Australian fighter was in the ring with one of his sparring partners. The slap of gloves was like music to Donald's ears.

"Just in time," welcomed Andy as he led him to the dressing-room, where he quickly shifted to fighting togs and then walked over to the ring.

A crowd of boxing-fans sat by the ring-side watching the big fellow work out. Donald's entrance caused a stir. His lithe, muscular body was the attraction of all eyes.

"Op in," commanded Andy. While an attendant was putting on his gloves, Donald studied the big man he was to help train. He would weigh at least two hundred pounds. His shoulders were enormously broad and square, and the muscles of his arms stood out in knobs and bunches. His face was a pearly colour, as though his training had been done inside. His jaw was square and strong, his eyes

a mild blue, and his nose looked as though it had stopped many a solid punch. "Strong but slow," Donald decided.

When Andy introduced him Hagin merely grunted. To the fighter Donald was simply one more punching-bag.

Donald turned to Andy. "What do you want me to do?" he asked. "Oh, knock the blighter out of the ring," rejoined Andy, with just a touch of sarcasm.

"Do you mean that?" queried Donald quickly.

Andy nodded. Hagin came to the centre of the ring, assuming an awkward crouch, his arms wound about his face. Donald circled him warily. The big man feinted with his left. Donald danced within range, and the Australian let loose a terrific right swing that would have felled an ox. Donald side-stepped, jabbed his left twice to the opponent's face, and his right missed Hagin's jaw by the fraction of an inch. A surprised look came over the big man's face. A murmur of applause came from the audience.

"Strike me pink! What a left 'and!" ejaculated Andy. Hagin scowled and tried to bring the fighting to close quarters, but was easily avoided by his lighter opponent.

Donald took the aggressive. His left found weak spots in the big man's defence, and repeatedly he sent in stinging jabs that drove his adversary's head back with a snap. Try as he might, Hagin could not get away from that whizzing left. It is a bitter pill to be beaten by one's sparring partner. So far the Australian had been given a boxing lesson. He forced Donald into a corner and made for him savagely. Donald ducked under the flail-like swings, and shot a left upper-cut to agitate the jaw. The latter staggered weakly to the ropes. Donald was after him like a flash. Just then he saw Andy gesticulating wildly and shaking his head. Hagin lunged forward and Donald fell into a clinch. The gong rang.

"What's the trouble, Andy?" asked Donald as he reached his corner. "Strike me lucky!" whispered Andy hoarsely, "you're punchin' me meat-ticket. You're makin' a blinkin' boob out of me 'easyweight'."

"You told me to knock him out of the ring," reminded Donald.

"Sure I did. But 'ow the 'ell did I know that you 'owse a blinkin' cyclone? Strike me blind, a left 'and like that I 'aven't seen since I 'anded Young Griffo'."

"What shall I do in the next round?" "Tyke a punch and go down—'urt your 'and'—anything to quit. But for 'even's sake don't mess up me 'easyweight any more! If the public ever 'ears of this our big fight is all off!"

In the next round Donald dropped to the floor as they broke from a clinch in the centre of the ring. He rose to one knee, holding his hand and making a very face.

"Too bad," sympathized Andy as he ordered him to the dressing-room.

As Donald stepped from the ring he was intercepted by a curly-haired youth whose brown eyes sparkled with enthusiasm. "By golly, I want to know you. My name's Douglas Rennie. My, but that was a wonderfully fast exhibition you gave us!" he ejaculated, gazing at Donald with undisguised admiration.

Donald flushed. "I appeared fast," he explained modestly, "as I was against a very slow opponent. I know nothing of Garrieau, but he won't

"RED ROSE TEA"

Reduced in Price

Lower Markets for good medium quality teas enable us to reduce the price of GREEN LABEL Red Rose Tea from 80c. to 75c. per lb. package, and to 38c. for the ½ lb.

The new prices will apply on stocks now on hand in the stores, as arranged with all the merchants who sell Red Rose Tea.

But due to an increasing demand the world over, the markets for extra fine quality teas, such as RED ROSE ORANGE PEKOE, are higher rather than lower—so we regret we cannot make any reduction in this grade at present.

RED ROSE TEA is put up only in Clean, Bright Aluminum Packages. The very best container for good quality tea.

T. H. ESTABROOKS CO., Limited, Winnipeg

have to be very clever to beat the Australian."

"Garrieau is fast and carries a knockout in either hand."

"I'm sorry for Andy's man if that is the case, as any kind of a left will beat Hagin. Come to the dressing-room," invited Donald.

A moment later Andy entered and sank dejectedly to a locker seat.

"You look rather blue, Andy," observed Donald.

"I am. All 'ell's a poppin'," admitted Andy.

"What's wrong?"

"I've lost me 'easyweight. 'E's quit."

"Why?"

"Said I framed on 'im by sending you in this afternoon. Said I 'urt 'is pride."

"Pride!" echoed Douglas sarcastically. "You've been treating him too well. I never thought much of him as a fighter. You're too good a trainer to be wasting your time on third-raters."

"Maybe you are right," conceded Andy, "but look what a blinkin' mess I'm in now! 'Ere I am in the 'ole three hundred bones for training expenses, and I've put up a forfeit with the promoters for appearance. I'll lose the 'ole lot. He threw out his arms with an air of resignation and sank back in his seat."

Little Andy presented a pitiful figure as he sat hunched in the corner—his jaunty manner gone; his blond head, usually held at a saucy angle, sunk on his chest. Gloom, deep, impenetrable gloom, enveloped this bright spirit from the Antipodes.

Donald knew now that for all Andy's munificent manner of yesterday, the three dollars to "eat on" and the sorely needed dinner he had bought, had come from a generous heart, but a depleted purse. Here was his benefactor in trouble. How could he help him? He crossed the room, sat down beside Andy, and placed his hand on the little man's arm.

"Andy, take me on. I'll fight Garrieau for you."

Andy came to his feet with a jump and seized Donald by the shoulders. "If you'll do that, me lad, I'll be your pal for life. Strike me pink, did you 'ear that? I've got a real fighter at last! 'Ooray!' The little fellow was in ecstasies. "We'll clean Garrieau up," he went on excitedly, "and then I'll type you to the States, and then I'll Austrialia, and..."

"Hold on," interrupted Donald laughingly, "looks like you intend making a professional pug out of me. I'm doing this to help you, Andy and..."

"You broke!"

Andy glanced over Donald's tall figure with a professional eye. "You 'ave a week to get fit, and 'as you 'aven't 'ardly any weight to take off, you should be top 'ole in this time."

"May I work out with you?" asked Douglas eagerly.

"Glad to have you," replied Donald.

A few minutes later the young men stepped to the street. Douglas seemed loth to go.

"Will you come to my home for dinner?" he invited.

Donald hesitated. It seemed ages since he had entered a private house. He glanced down at his only suit, which was rather seedy, then looked up, to find the usually roughish eyes of his companion fixed upon him seriously.

"Thanks, old man. I hope I may have the pleasure at some time, but I can't do it now."

"You said you were broke," began Douglas, hesitatingly, "can I—"

"No, no, I'll see you tomorrow," interrupted Donald, turning abruptly and walking swiftly down Granville Street.

(To Be Continued.)

Farmers Rebel Against Soviets
 Growing tension between farmers and the Soviet authorities, mainly in consequence of the requisition of grain, is reported by persons arriving from the Ukraine, South Russia. Dissatisfaction has resulted in open insurrection. Soviet houses have been set on fire and Soviet agents roughly handled.

Exercise

You need a cool and soothing rub down with Minard's Liniment after any form of exercise.

EVEREADY Radio Batteries

—they last longer

Use Eveready Layerbilt "B" Batteries for Economy

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude salts. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acidity. Each bottle contains full directions—any druggist.

Looks and Acts like a Costly Car because it's built like a costly car

The only Essex point in common with cars in its price field—is price. There is little in either appearance or performance to distinguish it from many a costlier car.

In size, it possesses the advantage of compactness without sacrifice of passenger quarters or riding comfort. It starts as easily as any car you have ever driven. Won't you examine and drive the Essex, whether as a prospective buyer or as one interested in knowing why it is the choice car in its price field as proved by sales?

\$885

and up

In Memorium.

In loving memory of our darling
Teresa Josephine Nichols, daughter
of Mr and Mrs G A Nichols of
Stony Plain, who passed away
June 4, 1927; aged 3 yrs. 2 mos.

Struck dumb by the death of our
darling.

At the closing of that day,
When our babe, our dear little
Teresa,
Was torn from our hearts away

We'll forget not the form of our
darling.

The beautiful smiling face.
All gone—and the bright hope we
cherished

Gone with them and quenched in
grave.

The cold little grave of our dar-
ling

Out there in the rain.
The dear little feet of our baby
That can never trip again.

Ever remembered by Mamma and
Daddy.

Notice re Schnurbart!

In view of the fact that
several of our tonsorial art-
ists have joined the threshing
outfits, to earn a few honest
dollars, gentls with whiskers to be
amputated will kindly hang onto
these until harvesting operations
are over, and the boys come home.

FIRE PREVENTION WEEK:
October 7—13.

Val Mohr motored up from
Leduc over the week end.

Mr A E Michael left on
Monday for Athabasca.

Mr & Mrs John Eberhardt,
of Edson, are visiting friends
here.

W M Washburn, M. L. A.,
was in attendance at the con-
ference in Edmonton, on Fri-
day, of the Cabinet ministers
and U. F. members of the
Legislature.

Visitors at the Comisarow
residence on Sunday were:
Miss L Newhouse, Miss M
Birdler, Miss L Mahlin, Miss
S Weinberg, Mr S B Wain-
berg, Mr A Wainberg, Mr &
Mrs Rodnysky, all of Edmon-
ton; Mr & Mrs Mahlin, of
Leduc.

A full account of the W. I.
Stony Plain Constituency
Conference will appear in next
week's Sun.

The next meeting of Stony
Plain W. I. will be held at the
home of Mrs J H Lory. Mrs
C A Gates will give an inter-
esting address of "Pictures in
the Home," and Roll Call will
be answered by "My favorite
picture, and why." All ladies
are cordially invited to at-
tend. Visitors always welcome.

On Friday, Nov. 2 a Hall-
oween Carnival and Dance
will be held in Wudel's hall.
Old and young plan to come.
Games of skill, with wonder-
ful prizes for the winners,
side shows, fortune-telling,
etc., will make this the best
event ever held in Stony.

7% is a good return on your
money; so is a subscription to
your local paper.

Rifle Club's Big Shoot

The Executive of the Rifle
Club have arranged to have
the season's big shoot on the
week commencing Oct. 15th.
\$300 in prizes will be com-
peted for, and all the crack
shoots of the club and from
the City will be present, to
compete for these.

The Lost Is Found.

Mr C A Granger, of Hay-
ward, Wis., was a visitor to
The Sun office on Friday.
This gent had come up all
the way to Alberta in an ef-
fort to locate his son Mar-
ion, who had farmed for some
time near Dapp, and then
traded this for a farm in Stony
Plain district. On making in-
quiry to the secretary of the
municipal district, the mis-
sing one was located. Mr
Granger Senior was highly
pleased on meeting his son,
whom he had not seen in ten
years.

Here and There

(134)

The sleaze-bag for grain burn-
ing that the port of Montreal has
experienced in season was re-
peated on August 21st when 200
cords were set on fire. The
burned mark for the 21 hours and
minutes were recorded. The
1,000,000 bushels a year for a
3,500,000 bushels for one day.

The almost complete absence of
forest fires with their smoky
acrossing mists is a relief. The
brightest of these, at the alt in this
region has had the present tour at
season the best on record in
British Columbia. Many touring parties
travelled over the Canadian
Pacific line, some breaking the
journey to motor over the pictur-
esque Banff-Windermere highway.
Among other groups may be men-
tioned the Alpine Club of Canada
which held its camp at the Lake of
the Hot Springs, followed by
the Trail Riders of the Canadian
Rockies.

Approximately 250 new elevators
have been constructed throughout
Alberta this year. It is estimated
by local grain men. The total
capacity of these elevators would
be about 18,000,000 bushels. It was
stated. Complete figures for ele-
vator construction in the province
were not available, but grain men
stated the construction of elevators
had been proceeding rapidly in all
parts of Alberta. The capacity of
the elevators varied from 25,000
bushels to 110,000 bushels. The
Alberta Wheat Pool alone has 110
1927 and practically all the public
grain elevator companies have in-
creased their storage capacity.

For the first season in a number
of years the Nipigon trout may be
said to abound. Hydro-develop-
ment with accompanying fluctua-
tions in water levels, has resulted
extinction of this exceptionally
prize fish, but the careful restora-
tion of the past three seasons has
apparently restored the world's
most famous trout stream to some-
thing of its old standing. Six
quarts of the Runzlow Camo here
brought in 125 pounds of fish ven-
derday, counting a few number of
four and five-pound trout caught
mostly at the entrance to Lake
Polly. Pike and suckers still
abound in large numbers, so it is
thought that the restoration of the
water level rather than the destruc-
tion of natural enemies has brought
back the Nipigon trout.

Entirely new and important
schemes involving large expendi-
tures on the part of the Canadian
Pacific Railway in the placement of
British colonies upon the land are
to be undertaken through the De-
partment of Colonization and De-
velopment of that company, work-
ing in co-operation with the Over-
seas Settlement Committee of the
British Government. The details
of these schemes have been ac-
celerated during the present visit to
Canada of Lord Lovat, Under Sec-
retary of State for Dominion Af-
fairs and chairman of the Overseas
Settlement Committee. One un-
derstanding provides for the building
of one hundred cottages by the
Canadian Pacific for the use of
British families. They will be
used to make families accustomed
to Canadian conditions and farm
life before being established on
terms of their own.

Spruce Grove News

The Ladies' Aid of the
local United Church meet
next Thursday evening, Oct.
21st, at the home of Mrs Jas.
Elder.

On Sunday morning Oct.
14th, Prof. A E Ottewill, of
the University of Alberta, will
be the speaker at the
local United Church.

Weed Inap. Medcalf is on
the warpath for those farm-
ers who neglected to suppress
the noxious weeds on their
farms, and let these go to
seed. About half-a-dozen
grain growers of this district
will probably face the Magis-
trate on Tuesday next, on
charges of infractions of the
Weed Act.
